| 📍 #87 Caingin, Hipolito St. Malolos City, Bulacan
| ☎ +63 947-460-5787 | ✉ fillar.vincent02@gmail.com

OBJECTIVE

Passionate about web development and PC troubleshooting, I aim to grow continuously by exploring new web technologies and tools. I strive to expand my skills in both frontend development and computer systems to contribute effectively to modern digital solutions.

EDUCATION

BULACAN STATE UNIVERSITY (Cumlaude) Bachelor of Industrial Technology Major in Computer Technology	2021-2025
CMIS-STO ROSARIO (With Honor) TVL- ICT	2019-2021
CMIS-STO ROSARIO	2015-2019

EXPERIENCE

VENDO PRINTING MACHINE SYSTEM

- A thesis project focused on a vending-style printing system that connects a kiosk screen to a printer. This was my first coding project using React.js and Tailwind CSS, with Firebase as the backend. At the time, I mainly assisted with the frontend development

3js COMPUTER ENTERPRISES

- During my OJT, I took a break from coding to explore my other skills. I joined 3JS Computer Enterprises, where I learned how to troubleshoot, diagnose, and repair computers, laptops, and printers.

MINIPROJ

- A small project for myself, just to practice coding and further improve my coding skills.

PAGSASAKA

- I'm currently building a complete website focused on selling freshly harvested farm products. You can check it out at <https://pagsasaka.bpc-bsis4d.com> — though it still shows the old UI/UX for now, as I'm actively working on the new frontend using Next.js, with components from Shadcn and Reactbits and its backend using node express.js and mysql for its database"

SKILLS AND TOOLS

- Team work
- Leadership
- Effective Communication
- Critical Thinking
- github
- Html/css/javascript
- React.js/Next.js
- Shadcn
- Figma
- Reactbits
- Node.js
- Express.js
